Demo video script, about 3 minutes

Short lines to speak, scene by scene. 16:9, 1080p, English subtitles. File name `International-Zishi-DemoVideo.mp4`.

Before you record: laptop awake with Docker running; clean browser window at 100 percent zoom; public link, no demo token; one practice run; tabs ready for GitHub `docs/FISCO_EVIDENCE.md` section 8, `docs/EXECUTION_EVIDENCE.md` section 3, and a terminal in `web/`.

#	Open or click	Say
1	Home page, scroll	"A spraying drone costs 55,000 yuan. The pilot has nothing to pledge. With Zishi, the drone itself borrows, repays from every job, and owns itself at zero. Team Zishi, Topic F."
2	"Watch the demo", then Start; point at a FISCO "Contract:" card	"Every card is a real transaction on FISCO BCOS, WeBank's blockchain. The money moves inside our smart contracts."
3	First job shows declined	"Too little profit after the loan payment. The rules say no."
4	Ask the agent: "Why was this job declined?"; type 3.5, "Check rate"; "Accept at 3.7"; "Lower the reserve"; toggle 中文	"The pilot asks why. The agent explains and suggests 3.7. At 3.5 it still says no, at 3.7 yes. Break a rule? It refuses. In Chinese too."
5	Click "Contract: JobBoard.confirm"	"This job pays. The contract splits the fee: lender, bond, pilot."
6	Held flight log card	"A fake flight log. The GPS check catches it, and the money stays locked."
7	"Contract: BondV2.slashByProof" card	"The AI is tricked into paying a stranger. Proof is on chain, so the AI vendor's bond pays, not the pilot."
8	Title card	"Loan at zero. The pilot owns the drone."
9	A "Recovery:" line, then FISCO_EVIDENCE section 8	"If a call fails, it retries or refunds. 24 of 24 transactions succeeded."
10	EXECUTION_EVIDENCE section 3, click a hash to Basescan; then terminal `pnpm verify:all`	"The same job ran on a public chain. One command re-checks every claim: 353 of 353."
11	/app/evidence: "Owner impersonation", "Send it to the agent"	"52 attacks blocked. The AI never holds a key or picks who gets paid."
12	FISCO_EVIDENCE "FATE model provenance"	"Built on WeBank's FISCO BCOS and FATE: lenders share a credit model, not their data."
13	Home page, toggle 中文	"Zishi. Machines that pay for themselves. zishi-fintechathon.vercel.app."
